

Our LIFE-SIZE whale and education team are visiting Gippsland in June

We would love to ~~eat~~ meet your children!

Through The Eyes Of A Whale is not just about whales, it's really a 19m ambassador for Victoria's coastal environment and a cross-curriculum platform to support VELS. Our teacher resources assist in integrating the experience into programs.

We bring the museum to your children. Bones, teeth and other artefacts, amazing research footage, and experienced marine educators help to make it an unforgettable experience.

Your students will experience the scale of a whale *from the inside!* Our 19m inflatable whale gives students an experience they cannot get any other way.

Your students will be left excited and motivated about Victoria's marine treasures. Stunning images, videos and stories will take your students into a world that our whales share with species that are not found anywhere else on the planet but Victoria.

Students step into the shoes of a marine scientist. Students will identify whales from their sounds – just like scientists!

Sessions can be 90 or 60 minutes and for two grades or minimum of 35 students per session.

90 minute sessions \$11.00 per student (GST inc)

60 minute sessions \$8.80 per student (GST inc)

Don't let your children miss out- call our educators on 1300 130 949

Make sure you see our promotional video (if you didn't receive it with this flier email us or visit our website - dolphinresearch.org.au and click the Marine Education Teacher's Entry point).
