

CASEY AMBASSADORS CATCH THE LITTER BUG

What a brilliant workshop we had recently with our 52 *'i sea, i care'* Ambassadors from schools across the City of Casey region.

The Ambassadors learned about how modern litter traps work to catch our waste before it enters our waterways, followed by tree planting, water pollution testing, and freshwater invertebrate identification activities. A big day, and well worth it.

The students learned that conservation can be a lot of fun - and how they can spread awareness about simple solutions to help reduce litter entering our waterways.

Thank you so much to Councillor Rosalie Crestani, Andrew and Robert from Rocla, David Westlake and Adrian Verkerk and the Waste and Sustainability team from the City of Casey. Also, Ray and Steve from Friends of Frog Hollow, and the wonderful parents and teachers who brought the Ambassadors along to this amazing experience!

“NOT EVERYTHING THAT CAN BE COUNTED COUNTS. NOT EVERYTHING THAT COUNTS CAN BE COUNTED.”

— William Bruce Cameron, US author

The humpback whales are here ... Excited whale watchers have sighted humpbacks along the coasts of the Mornington Peninsula and Phillip Island, and even off the shore in Mt. Eliza as they migrate from the Southern Ocean to spend the winter in the warmer northern waters!

Come and visit the Dolphin Research Institute team at the Phillip Island Whale Festival in Cowes, July 5th-7th and see our amazing activities -even step inside our full size inflatable whale.

Learn about all things whale at the DRI educational stall, or join DRI research scientists on a Spot a Whale tour, where you can learn how to spot whales from the beautiful Cape Woolamai and Pyramid Rock lookouts!!
